**Children’s services**

### Extended Foster Care Services

The 2017 Washington State Legislature directed WSIPP to complete a study measuring the outcomes for youth who have received extended foster care services pursuant to RCW 74.13.031(11). The study will include measurements of any savings to state and local governments and compare outcomes for youth who have received extended foster care services pursuant to RCW 74.13.031(11) with youth who aged out of foster care when they turned 18. To the extent possible, the study will also include a comparison of extended foster care programs in other states and a review of the available research on those programs.

A preliminary report was released in November 2018. The original report deadline was December 1, 2019, however, WSIPP's Board of Directors approved an extension. The final report will be delivered to the legislature by May 1, 2020.

### Short-Term Foster Care Support Services

The 2017 Washington State Legislature directed WSIPP to complete an evaluation of short-term foster care support. The legislation describes short-term support as case aides who provide temporary assistance to foster parents as needed with the overall goal of supporting the parental efforts of the foster parents. The short-term support does not include overnight assistance. The evaluation will, to the maximum extent possible, assess the impact of the short-term support services on the retention of foster homes and the number of placements a foster child receives while in out-of-home care, as well as the return on investment to the state.

A preliminary report was released in November 2018. The final report was originally due to the legislature by June 30, 2020. In 2019, the legislature passed SSB 5955 which extended the due date of the final report to June 30, 2021.

### Dually Involved Females

The 2018 Washington State Legislature directed WSIPP to conduct a statewide study on the needs of girls and young women concurrently involved in the juvenile justice and child welfare system, referred to in the legislation as “dually involved females.” To the extent possible, the study must review available data to understand the prevalence and demographics of dually involved females and their families and track outcomes such as academic, social, and vocational achievement. WSIPP will also summarize available information on other states’ systems that address and treat the needs of this population. Finally, WSIPP was directed to conduct a benefit-cost analysis of programs for dually involved females.

The original deadline was July 1, 2019, however, WSIPP’s Board of Directors approved an extension. The final report will be delivered to the legislature by November 1, 2019.

### Update to Inventory of Evidence-Based, Research-Based, and Promising Practices for Prevention and Intervention Services for Children

The 2012 Legislature passed E2SHB 2536 with the intention that “prevention and intervention services delivered to children and juveniles in the areas of mental health, child welfare, and juvenile justice be primarily evidence-based and research-based, and it is anticipated that such services will be provided in a manner that is culturally competent.”

The bill directs the Washington State Institute for Public Policy (WSIPP) and the University of Washington Evidence-Based Practice Institute (UW) to publish descriptive definitions and prepare an inventory of evidence-based, research-based, and promising practices and services, and to periodically update the inventory as more practices are identified. This will be the ninth update to the initial inventory published in September 2012. WSIPP will update reviews for all child and youth mental health services currently on the inventory.

The inventory and accompanying report will be published in December 2019.

Eva Westley, (360) 664-9089
The 2019 Washington State Legislature directed WSIPP to conduct an evaluation on the outcomes of resource and assessment centers licensed under RCW 74.15.311 and contracted with the Department of Children, Youth, and Families (DCYF). As part of the evaluation, WSIPP was directed to collect data regarding the following:

- The type of placement children experience following placement at a resource and assessment center;
- The number of placement changes that children experience following placement in a resource and assessment center compared with other foster children;
- The length of stay in foster care that children experience following placement in a resource and assessment center compared with other foster children;
- The likelihood that children placed in a resource and assessment center will be placed with siblings; and
- The length of time that licensed foster families accepting children placed in resource and assessment centers maintain their licensure compared to licensed foster families receiving children directly from child protective services.

The report is due to the legislature, DCYF, and the Oversight Board for DCYF by December 8, 2020.
